

Introduction

The **Teraudio™ series Kevlar 8" ceiling speaker** is a high quality speaker with clear and natural sound, suitable for home and professional installations.

Installation is quick and easy with a cut out template in the box and gold-plated spring-loaded terminals connections.

The speakers feature a slim profile once installed, with an attractive paintable magnetic grill with thin trim around the edge for tidy appearance.

Quality materials and an adjustable tweeter allows for high frequencies to be focused in the direction of the listening area for maximum sound quality.
